1. Introduction & Key Features

The Household Expense Tracker is a modern full-stack web application designed to help households seamlessly log, categorize, analyze monthly expenses, and track budget targets in real-time.

* Key Features:

- * **Dual-Mode Storage**: Persistently saves to a Python FastAPI + SQLite backend database, with an automatic fallback to **Browser LocalStorage** when offline or in demo mode.
- * **Monthly Budget Target Monitoring**: Visual budget progress bar with automatic warning alerts (**Green**, **Yellow**, **Red Alert** when exceeding budget).
- * **Interactive Visual Analytics**: Category percentage distribution Donut Chart and Expense Type Bar Chart.
- * **Smart Instant Search & Filter**: Filter transactions by keywords, specific categories, or expense types.
- * **CSV Report Export**: Download monthly expense reports in `.CSV` format compatible with Microsoft Excel and Google Sheets.

2. Header Navigation & Storage Mode

At the top of the application page, you will find the main header navigation bar:

Gambar: Header & Period Navigation

Header Elements:

- 1. **Title & Icon**: Displays the application title " Household Expense Tracker".
- 2. **Month & Year Selectors**: Use the dropdown menus to switch between different reporting periods.
- 3. **Storage Mode Status Indicator**:
 - * [SAFE] **FastAPI Server (SQLite)**: Connected to local Python backend. Data is saved permanently.
 - * [WARN] **Demo Mode (LocalStorage)**: Backend server is offline; data is stored locally in your browser.
- 4. **Export CSV Button**: Downloads the current period's transactions to a `.CSV`` file.
- 5. **+ Add Expense Button**: Opens the modal dialog form to log a new expense transaction.

3. Reading Dashboard & KPI Summary Cards

The dashboard features 4 primary Key Performance Indicator (KPI) cards that provide an instant snapshot of your finances:

Status Mode Simpan Data: Terhubung ke Backend Python FastAPI (SQLite)

Bisa dipublish di Vercel & Render secara gratis

Gambar: Dashboard & KPI Cards

KPI Card Breakdown:

1. **Total Expenses This Month**:
 - * Displays the cumulative sum of all logged expenses in Indonesian Rupiah (IDR) for the selected period.
2. **Monthly Budget Target & Remaining**:
 - * Displays your monthly budget allocation (Default: IDR 5,000,000) and remaining unused balance.
 - * Color Progress Bar:
 - * [SAFE] **Green (< 75%)**: Safe spending level.
 - * [WARN] **Yellow (75% - 100%)**: Spending is approaching monthly budget limit.
 - * [ALERT] **Red (> 100%)**: Budget limit exceeded!
3. **Daily Average Estimate**:
 - * Estimated average spending per day for the current month.
4. **Total Transactions**:
 - * Total count of recorded expense items in the selected period.

4. Visual Analytics & Charts

The application provides two dynamic chart views powered by Recharts to analyze resource allocation:

Gambar: Visual Analytics Charts

- 1. **Donut Chart (Category Percentage)**:
 - * Visualizes expense percentage breakdown across categories (*Groceries*, *Bills & Utilities*, *Transportation*, *Entertainment*, *Healthcare*, etc.).
 - * Hover over chart segments to view exact amounts and percentage distributions.
- 2. **Bar Chart (Expense Type)**:
 - * Compares total expenditure across expense types (*Shopping*, *Bills*, *Snacks*, *Transit*, *Topup*, *Others*).

5. Adding a New Expense Entry

To record a new expense, follow these simple steps:

Gambar: Add Expense Modal Form

Step-by-Step Guide:

- 1. Click the green **+ Add Expense** button located at the top-right of the header bar.
- 2. The modal dialog will open. Complete the following fields:
 - * **Transaction Name** *(Required)*: Enter the item description (e.g., `Weekly Groceries`).
 - * **Amount (IDR)** *(Required)*: Enter numeric value without dots/commas (e.g., `350000`).
 - * **Date** *(Required)*: Select transaction date.
 - * **Category** *(Required)*: Select appropriate category from dropdown.

- * **Expense Type** *(Required)*: Select type (*Shopping*, *Bills*, *Snacks*, *Transit*, *Topup*, *Others*).
 - * **Notes** *(Optional)*: Add optional details or items purchased.
3. Click the green **Save Transaction** button.
4. The new entry will instantly appear in the transaction table and update dashboard stats and charts.

6. Real-Time Search & Transaction Filtering

Quickly locate specific entries using the instant Search and Filter bar located above the transaction table:

Gambar: Filters and Real-Time Search

- * **Keyword Search Input**: Type any transaction name or note (e.g., `Groceries` or `Electricity`) for instant filtered results.
- * **Category Filter Dropdown**: Filter table to show only items matching a chosen category (e.g., *Groceries & Staples*).
- * **Type Filter Dropdown**: Filter table by expense type (e.g., *Bills*).

7. Editing & Deleting Transactions

Modify or delete existing records at any time using the Actions column in the transaction table:

Gambar: Action Edit and Delete

****Editing a Transaction**:**

1. Click the ****Pencil (Edit)**** icon on the target row.
2. Modify transaction fields in the edit modal.
3. Click ****`Save Changes`****.

****Deleting a Transaction**:**

1. Click the ****Trash (Delete)**** icon on the target row.
2. Confirm deletion in the prompt dialog.

8. Exporting Monthly Reports to CSV

Generate offline spreadsheet-compatible reports in ``CSV`` format:

Gambar: CSV Report Export

How to Export:

1. Select the desired **Month** and **Year** period from the header navigation.
2. Click the **Export CSV** button in the header bar.
3. A file named `Laporan_Pengeluaran_M_YYYY.csv` (e.g., `Laporan_Pengeluaran_8_2026.csv`) will be downloaded to your browser's Downloads folder.
4. Open the file in **Microsoft Excel**, **Google Sheets**, or any spreadsheet application.

9. Troubleshooting & Frequently Asked Questions (FAQ)

TIPS:

Common Questions & Answers:

>

1. **Why does the status indicator display "Demo Mode (LocalStorage)"?**

This indicates the FastAPI backend server is not running. The web app automatically operates in client-side storage mode so you can continue using all features seamlessly.

>

2. **Is my data safe in Demo Mode?**

Yes, your data is stored securely in your web browser's local storage. However, clearing browser cache may reset this offline data. Running the Python backend is recommended for persistent long-term storage.

>

3. ****Can I customize the monthly budget limit?****

The default monthly target is IDR 5,000,000, which can be customized in the application configuration settings.
